

Site Audit: Overview

anidsiam.github.io

- The overall health score of your website is 80 out of 100, which has stayed the same since the last check.
- The score for how easily artificial intelligence search engines can read and understand your website is 81 out of 100, which also has not changed.
- Out of the 100 pages checked on your website, only 3 pages are completely healthy, 95 pages have some issues, and 2 pages are completely broken and do not load.
- None of your pages are blocked from artificial intelligence search tools, allowing these systems to read all of your website content.
- There are 92 major problems on your website that need to be fixed, and 93 minor issues that should be looked at later.
- The most frequent major problem is that 82 pages use the exact same short summary text that appears in online search results, making it difficult for visitors to distinguish between different pages.
- Other major problems include 4 pages that share the exact same main title, 4 pages that contain identical written text, and 1 security setup error.
- Additionally, there is 1 minor security setting warning that needs to be adjusted.

Based on the limited data available, these are the initial observations. A more detailed analysis will be possible as more data accumulates over time.
